Annual report 2024 for Vipps MobilePay AS and the Vipps Group

Vipps MobilePay AS consists of two strong brands with Vipps in Norway and MobilePay in Denmark and Finland. We are the number one mobile wallet in the Nordics. Vipps was also launched in Sweden in September 2024, with both domestic and cross border person to person payments.

By the end of 2024, Vipps MobilePay had more than 12 million users, 540 000 sales units and more than 1.35 billion transactions throughout the year.

Across Europe, many digital wallets are facing competition from the biggest tech companies in the world, which are increasing their efforts in the payments space. The Nordic consolidation of Vipps MobilePay means we can meet that competition as a local Nordic alternative.

Vipps MobilePay's vision and ambition is clear: To be the most loved wallet in the world, replacing hassle with dazzle for all. We are making strong and steady progress towards that goal.

The Nordics

- More than 12 million users across Norway, Denmark, Finland and Sweden by the end of 2024. A growth of 6.8%.
- 1.35 billion transactions.
- 18% growth in ecommerce volume.
- 18% growth in transaction income.
- More than 540 000 sales units offering Vipps MobilePay.

Norway

- By the end of 2024, Vipps had almost 4.6 million Norwegian users, 206 000 new users during the year, and approximately 73% of the users were active each month.
- On average, each user made 127 transactions during the year, totalling in 582 million transactions.
- Vipps is increasingly being used as a payment method for online purchases. Vipps' revenue growth in ecommerce was 21% in 2024.
- The share of paid transactions has increased from 52% in 2023 to 54% in 2024.
- After launching instore tap to pay December 9th, we had 630 000 activated tap to pay users by end of year.

Denmark

- By the end of 2024, MobilePay had more than 4.6 million Danish users and more than 213 000 new users during the year. Approximately 82% of the users were active each month.
- On average, each user made 123 transactions during the year, totaling in 572 million transactions.
- MobilePay is increasingly being used as a payment method for ecommerce in Denmark, with a revenue growth of 21% in 2024.
- The share of paid transactions increased from 53% in 2023 to 55% in 2024.

Finland

- By the end of 2024, MobilePay had 2.8 million Finnish users and more than 272 000 new users during the year. Approximately 53% of the users were active each month.
- On average, each user made 62 transactions during the year, totaling in 173 million transactions.
- MobilePay is increasingly being used as a payment method for ecommerce in Finland, with a revenue growth of 23% in 2024.
- The share of paid transactions increased from 41% in 2023 to 42% in 2024.

Sweden

- In September, Vipps was launched in the Swedish market, with cross border transactions and person to person payments as the first products. By the end of 2024, there were about 70 000 Swedish users that made 71 000 transactions.

Key financial numbers for Vipps MobilePay 2024

This is the second year that Vipps MobilePay Group reports on a full accounting year. The 2023 accounts for parent company Vipps MobilePay AS include a full year for Vipps and merged MobilePay from May. This will affect year over year comparisons. Vipps MobilePay AS had an annual income of NOK 1 707 million in 2024, an increase of NOK 406 million from 2023. If Vipps and MobilePay had full year joint reporting in 2023, the increase in annual income would have been NOK 141 million.

The annual result before tax for Vipps MobilePay in 2024, was a loss of NOK 751 million, compared to a loss of 989 million in 2023, a reduction of NOK 238 million in losses. If Vipps and MobilePay had full year joint reporting in 2023 the reduction in losses would have been NOK 447 million before tax.

The Nordic wallet

Vipps MobilePay is a Nordic mobile wallet that was once two: Vipps, founded in Norway, and MobilePay, which originated in Denmark and widely used in Finland. In 2024, Vipps MobilePay has made many internal changes and launched numerous products to position us for new growth, profitability, and to maintain user and merchant brand loyalty.

In early 2024, we completed the development of one technical platform, and one app and product stack for all markets. It marked a significant milestone for us in our journey from two companies to one.

In June, Vipps MobilePay launched cross border payments – simplifying payments across Denmark, Finland, and Norway. This launch created a lot of engagement from our users and stakeholders eager to reduce payment barriers across the Nordics. This solution was also extended to Sweden in September of 2024.

In July, the EU Commission announced that it had accepted Apple's proposal to open the NFC technology (tap to pay) in the iPhone for third party digital wallets – such as Vipps MobilePay. This is important for our ability to compete in in-store payments, which still make up around

75% of all payments in the Nordics. Just four months later in early December, we launched the Vipps tap to pay solution together with BankAxept in Norway, as the first alternative to Apple Pay on iOS in the world.

The merger has also led us to seek synergies and simplify our setup. This, combined with the need to reduce our cost base, led to the closure of the Vilnius branch, with about 100 employees directly affected. The office closure was completed in May 2024. As part of adjusting the company for the future, we also made organizational changes during the first half of 2024. By the end of 2024, Vipps MobilePay had 560 employees.

Other highlights:

- Going beyond payments by launching wish lists, expanding loyalty products, and log-in products to strengthen our position in and around payments situations.
- New donation products, developed in collaboration with NGOs.
- Launching an artificial intelligence anti-fraud model that reduced the Vipps related “Olga scams” Norway by more than 98%.

Culture and working environment

2024 has been a year with several milestones for our company culture. The successful delivery of our shared technical platform (“One Platform”) was important for this. This major achievement showed what we can deliver together as one company and was a boost for our shared culture.

We have established structured initiatives to develop employees and leadership. Senior leaders meet regularly to discuss and align on strategy throughout the year. During the fall we launched our first Vipps MobilePay leadership development programme, enabling leaders to drive our culture and support their teams’ development.

In our final engagement survey of the year, we reached our highest engagement scores since the merger.

Net profit and allocations

In 2024 Vipps MobilePay Group recorded a loss after tax of NOK 880 million, compared with a loss of NOK 1 095 million in 2023. The Group's revenues increased by NOK 140 million from the previous year. The Group has experienced revenue growth in all product areas in 2024, from which the ecommerce solution delivered the largest contribution to the growth. The reduction in losses is also related to synergies from consolidation of technological platforms of Vipps and MobilePay and a high focus on cost saving activities throughout 2024. It is proposed that the parent company's deficit is to be covered from other equity.

Liquid assets and capital adequacy

The Group's liquidity position is satisfactory as of 31 December 2024. The Group's cash flow in the period shows a negative contribution from operations of NOK 557 million, while the cash flow from investment and financing activities makes a positive contribution totalling NOK

136 million in 2024. The Group had liquid assets of NOK 588 million at year-end.

The Group had equity of NOK 2 789 million at year-end, while total liabilities was NOK 805 million.

The parent company is subject to a capital requirement. The capital requirement at year-end was NOK 103 million, and the company had a capital buffer of NOK 143 million. This means that the Group's capital adequacy is satisfactory at year end, and is monitored continuously going forward.

The Group has limited exposure to financial risk. The main financial risks to which the Group is exposed are related to credit risk and liquidity risk, both of which are considered limited.

Going concern

Pursuant to Section 3-3a of the Norwegian Accounting Act, it is confirmed that the going concern assumption is realistic and that this assumption has been used as a basis for the preparation of the accounts.

Statement on the annual accounts

The Board of Directors is not aware of any matters of importance for assessing the company's position and results that do not appear in the accounts and the balance sheet with notes. Nor have any circumstances arisen since the end of the financial year which, in the view of the Board, are of significance in the assessment of the accounts. The Board emphasises that there is normally considerable uncertainty associated with the assessment of future conditions.

Risk factors

The most significant risks Vipps MobilePay is exposed to are categorised into business, financial, operational and compliance risks, all of which have the potential to affect our customers, products, systems, processes, and reputation.

- Business Risk is the risk of unexpected revenue and/or cost fluctuations resulting from changes in external factors or events, such as macroeconomic changes, changed customer behaviour, changes in the market and in competition or regulations from authorities, which harms the reputation and/or financial performance of Vipps MobilePay.
- Financial risk is the risk of a financial loss for the company resulting from capital adequacy, liquidity, or credit risk.
- Operational Risk is defined as non-financial risk resulting from failed or inadequate internal processes, people, and systems or from external events.
- Compliance risk is the potential exposure to material loss, legal penalties, monetary fines, or regulatory sanctions, resulting from a failure to act in accordance with laws, regulations, contractual obligations, industry standards or internal policies and standards.

The company employs sound risk management practices and risk-based prioritisations to mitigate and avoid such negative consequences. This structured approach ensures that we

effectively identify, assess, and manage risks, thereby safeguarding our stakeholders' interests and maintaining the trust and integrity of our services.

Risk management

Effective risk management is integral to Vipps MobilePay's operations and is essential for value creation over time. The company's approach to risk management supports strategic development, goal achievement, regulatory compliance and financial stability.

This is achieved through:

- Sound risk profile: Maintaining a balanced risk profile is crucial to Vipps MobilePay's operations.
- Standardised tools and processes: The company employs harmonised tools and processes to ensure integrity in risk and compliance assessments. This provides a comprehensive, high-quality, and cost-effective approach to risk management and internal control.
- Efficient Risk, Control, and Compliance assessments: Business-wide and technically integrated assessments enable Vipps MobilePay to promptly identify new risks, regularly reassess existing risks, and ensure the effectiveness of risk mitigation and internal controls.
- Strong risk culture: Vipps MobilePay's risk culture is characterised by risk awareness and a thorough understanding of risk/reward considerations. This ensures that risks which could significantly impede the achievement of the company's goals are effectively managed.

This structured approach ensures that significant risks are identified and managed efficiently. Especially in extraordinary situations, it is crucial that risks are analysed and aggregated at the company level to provide the Board and Leadership Team with a solid foundation for making informed, risk-based decisions and setting priorities.

Vipps MobilePay's proactive risk management framework safeguards stakeholders' interests and maintains the trust and integrity of our services.

Responsibility for risk management and internal control

The Board of Directors is ultimately accountable for ensuring that Vipps MobilePay is organised and managed in a prudent manner, with appropriate governance, risk management and internal control arrangements. The Board sets the criteria for acceptable risks that Vipps MobilePay can accept to achieve its goals.

Risk management and internal control is a line responsibility that follows the organisation of the company. All leaders are responsible for ensuring that activities within their area or team are carried out and documented in accordance with the framework for governance, risk management and internal control. Vipps MobilePay's employees and consultants have an independent responsibility to assess the risks they see in their daily work, implement risk-reducing or controlling measures, as well as continuously manage and report incidents and deviations.

The company's independent control functions, constituting Vipps MobilePay's second line of defence, are responsible for the company's risk management, internal control, compliance, and information security frameworks, tools and processes. These functions have advisory, preventive and controlling tasks. The risk management function shall generally ensure a high quality of risk follow-up, so that no single incident can cause serious or critical consequences for the company.

The Risk & Compliance function has a right and a duty to report directly to the Leadership Team and/or Board of Directors.

Insurance for members of the Board and CEO

The company is covered by Vipps Holding AS' "Directors & Officers insurance" on market terms from a reputable insurance company.

Development of risk management and compliance in 2024

The main strategic risk factors arise from the increasing competition from global tech companies, in all payment situations. Vipps MobilePay aims to establish prioritisation principles to balance product innovation, necessary operational improvements, and compliance requirements.

Looking ahead, Vipps MobilePay will capitalise on the synergies and capabilities of its common technological platform to develop and launch new revenue-generating products. From a risk and compliance perspective, it is crucial to ensure robust risk management, compliance awareness, diligent product governance, and secure software development. This also entails maintaining the capacity to respond swiftly to market shifts and changes in the competitive environment. Vipps MobilePay must continually ensure its resilience to change and foster a change-positive organizational culture, thereby enhancing its ability to adapt promptly.

Statement under the Transparency Act

A statement of due diligence conducted under the Transparency Act will be published on the company's website www.vippsmobilepay.com latest 30 June 2025.

Working environment, equality and discrimination

The Board considers the working environment in the company to be good. We see employees are more adjusted to a new company culture, although still with some challenges. A flexible work policy enables employees to work from home when needed. In addition, a People Policy states clear principles for a safe and inclusive workplace and equal treatment in recruitment and compensation practices.

We are still focused on equal treatment and diversity. At the executive level, we have 50% women and at board level 4 of 10 are women. 50% of leaders in the company are women. In the product and technology area, we still struggle with gender diversity. 13,7% of employees

and 15% of leaders are women. There is awareness of this gap, and stronger targeted initiatives to increase gender diversity in this area are being initiated.

Salary mapping and equal pay will be reported every second year, next time for 2025.

Equality and non-discrimination in practice

Vipps MobilePay AS benefits, guidelines and people policies are designed to promote, secure and facilitate diversity in gender, age, private situation, ethnicity, orientation and functional ability. We consciously work on fair compensation throughout the employee's lifecycle, and through salary settlements and the award of variable rewards and other benefits. During 2024, we started using external benchmarks and transparent internal compensation guidelines that supports compensation equality.

Vipps MobilePay AS conducts regular employee surveys to ensure that there is an anonymous arena to share concerns or report discrimination, which HR and the leadership team follow up on. Exit interviews and surveys are also conducted with those who leave the company to follow up on improvement measures.

Engagement survey results and workplace satisfaction are regular topics in local work councils. A shared incidents reporting for wellbeing, whistleblowing and other incidents is easily available for all employees.

Vipps MobilePay attaches great importance to gender equality in recruitment internally and externally. There are initiatives to attract and hire more women in technology-oriented positions, which currently have a large majority of men.

Our practices in the recruitment process include:

- Use of gender-neutral words in job announcements. Main purpose is to attract both genders.
- Candidates are assessed objectively with focus on their skillset, experience, work related case and the possibility to have anonymized profiles when needed.
- All female candidates who apply for positions within tech meets female representatives during the interview process.
- We make sure to include different viewpoints (not a one person's decision).

Environmental impact

Vipps MobilePay's core business does not pollute the external environment severely.

The company's climate footprint is primarily linked to the daily operation on the company's premises, employees' consumption in everyday work and our technology platform.

Research and development activities

The company is engaged in continuous product development. Development costs are capitalised when it is possible to identify a future economic benefit related to the development of an identifiable intangible asset and when the acquisition cost can be reliably measured.

Future development

In the past year, Vipps MobilePay has proven to deliver products with high speed and quality as part of a 360 payments strategy, as well as delivering products that offer user and merchant value close to, but beyond payments. This is a strategy we will continue to deliver on and enhance in the next years, together with an ambitious growth agenda both in terms of commercial results and user growth.

Note 1 - Accounting policies

Vipps MobilePay AS is a limited liability company registered in Norway, with its head office in Oslo. These financial statements cover both Vipps MobilePay AS's consolidated accounts and company accounts. Some of the accounting policies will therefore only apply to the consolidated or company financial statements. This will be specifically indicated where relevant, otherwise accounting policies will apply to both sets of accounts.

Basis for preparation of the financial statements

The financial statements are prepared in accordance with Section 3-9 of the Norwegian Accounting Act and the regulations regarding simplified application of IFRS (2014) issued by the Norwegian Ministry of Finance on 7 February 2022. This primarily means that measurement and recognition comply with international accounting standards (IFRS) and the presentation and note information are in accordance with the Norwegian Accounting Act and generally accepted accounting principles. The financial statements are based on the principles of historic cost.

Consolidation (consolidated financial statements)

The consolidated financial statements show the overall financial result and the overall financial position when the parent company Vipps MobilePay AS and its controlled ownership interests in other companies are presented as an economic unit. The financial statements are prepared in accordance with uniform principles, in that ownership interests in other companies controlled by the parent company follow the same accounting policies as the parent company. All inter-company balances are eliminated.

Ownership interest in companies in which the Group alone has the deciding influence (subsidiaries) are consolidated 100 per cent, line for line, in the Group accounts from the day on which the Group gains control and continue to be consolidated until the day on which this control ceases. An enterprise in which the Group has invested is considered to be controlled by the Group if the Group:

- has control over the enterprise
- is exposed to or has rights to variable returns from its involvement in the enterprise
- is able to use its control over the enterprise to influence its returns.

Subsidiaries

Subsidiaries are assessed according to the cost method in the company financial statements. The investment is valued at the acquisition cost of the shares unless an impairment has been necessary. Write-downs are made to fair value when impairment is due to causes that cannot be expected to be temporary, and it must be deemed necessary in accordance with generally accepted accounting principles. Write-downs are reversed when the basis for the write-down no longer exists.

Dividends, group contributions and other distributions from subsidiaries are recognised as income in the same year as they are approved by the general meeting. If the dividend / group contribution exceeds the proportion of earned profit after the acquisition date, the excess amount represents the repayment of invested capital, and the distributions are less the value of the investment on the balance sheet of the parent company.

Branches

The branches in Denmark, Finland and Lithuania are booked in local currencies DKK and EUR and the Company's and Group's presentation currency is NOK. In the branches the balance sheet items are converted to the current exchange rate, including goodwill and the profit and loss items are recorded at the exchange rate at the time of the transaction. Currency effects are booked to other comprehensive income according to IFRS.

Acquisitions and business combinations (consolidated accounts)

The acquisition method is used for accounting for business combinations. Acquired assets and liabilities in connection with business combinations are measured at fair value at the acquisition date. The company is consolidated from the point at which the group gains control and is excluded from consolidation when control ceases. Costs related to acquisitions are expensed as they are incurred.

Non-controlling interests are calculated based on the non-controlling interests' share of identifiable assets and liabilities or at fair value. The choice of method is made for each individual business combination.

Goodwill is calculated as the sum of the consideration and the accounting value of non-controlling interests and the fair

This file is sealed with a digital signature.

of the document.

Document ID:
2850D89B763F467EB0343713D3193C51

value of previously owned equity interests, less the net value of identifiable assets and liabilities calculated at the time of acquisition. Goodwill is not amortised but is tested for impairment at least annually. Goodwill is allocated to the cash-generating units that are expected to benefit from the acquisition synergies, regardless of whether other assets and liabilities in the acquisition are attributed to these cash-generating units.

If the fair value of the net assets in the business combination exceeds the consideration (negative goodwill), the difference is recognised as income immediately at the acquisition date.

Use of estimates

In preparing the financial statements, estimates and assumptions have been applied that have impacted the income statement and valuation of assets and liabilities, as well as uncertain assets and liabilities on the balance sheet date in accordance with generally accepted accounting principles. Areas that contain a significant number of such discretionary assessments, a high degree of complexity, or areas where assumptions and estimates are significant to the financial statements are described in the notes.

Currency

Transactions in foreign currency are translated at the rate applicable on the transaction date. Monetary items in foreign currency are translated at the end of every period to the rate applicable on the balance sheet date. Non-monetary items measured at historical rates expressed in foreign currency are translated into Norwegian kroner using the exchange rate for the transaction date.

Revenue

Revenue from contracts with customers is recognised when control over a good or service is transferred to the customer, and in the amount that reflects what the Group expects to receive for the good or service.

Revenue consists of fees from transactions as well as distribution revenue.

The company has two different pricing models for fees. These are either a percentage of earnings (the amount paid/transferred using Vipps MobilePay) or a fixed amount per transaction. Revenue recognition is carried out upon completion of the transaction which entitles the company to payment.

The company also has an agreement that aims to establish a long-term cooperation with various distributors (banks) linked to Vipps MobilePay. The distributors pay an annual distributor contribution that is recognised as income during the period for which the distributor contribution applies.

Tax

The group is subject to the financial tax regime and therefore has a tax rate of 25%. The tax expense consists of tax payable and changes in deferred tax. Deferred tax on liabilities and equity is calculated on the basis of the temporary differences that exist between accounting and tax values, as well as the tax loss carried forward at the end of the financial year with the exception of:

- initial recognition of goodwill;
- initial recognition of an asset or liability in a transaction that:
 - is not a business combination, and
 - which at the time of the transaction does not affect either accounting profit or taxable income (tax loss)
- temporary differences related to investments in subsidiaries, associated companies or joint ventures when the group controls the time of reversal of the temporary differences, and it is assumed that this will not happen in the foreseeable future.

A deferred tax asset is recognised when it is probable that the company will have sufficient taxable profits in future periods to utilise the tax benefit. The companies recognise a previously unrecognised deferred tax asset to the extent it has become probable that the company can utilise the deferred tax benefit. Similarly, the company will reduce the deferred tax asset to the extent it no longer considers it probable that it can utilise the deferred tax benefit.

Liabilities and deferred tax assets are measured based on the expected future tax rate for the companies in the group where temporary differences have arisen.

Liabilities and deferred tax assets are measured at nominal value and classified as long-term liabilities (non-current assets) in the balance sheet. Tax payable and assets or liabilities for deferred tax are recognised directly against equity to the extent that the tax items relate to items recognised directly against equity.

Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for a consideration. Control is transferred to the lessee if, for the entire period of use, the lessee has (i) the right to receive essentially all of the economic benefits of using the asset, and (ii) the right to determine the use of the asset.

All the Group's leases are recognised on the balance sheet with the exception of short-term leases and low-value leases. Leases are recognised at the time the underlying asset is available for use (the effective date). Leases are recognised as an obligation to pay future lease amounts and an asset representing the right of use of the underlying asset during the lease term. The lease liability is calculated at the present value of the remaining lease payments. Lease payments include fixed rental payments and lease payments that are subject to index adjustment. Shared costs are not included. Entitlement to use the asset is measured by initial recognition at the same amount as the lease liability adjusted for any downpayments and/or accrued lease payments.

The lease liability interest is calculated, and the right-to-use asset is depreciated over the remaining lease period. The lease payment is presented separately as interest and depreciation expenses.

The discount rate used in present value and interest rate calculations is the company's marginal borrowing rate, which consists of a risk-free interest rate plus credit mark-up and deduction of any collateral. When assessing the remaining lease term, options to extend the lease are taken into account when the company is reasonably certain to exercise these options.

Fixed assets

Fixed assets include property, plant and equipment intended for production, delivery of goods, or administrative purposes and with a durable lifespan. Fixed assets are measured at acquisition cost, less accumulated depreciation and impairment losses. When sold or disposed of, the carrying amount is deducted and any loss (gain) is recognised in the income statement

The acquisition cost of tangible fixed assets is the purchase price, including duties/taxes and direct acquisition costs related to making the fixed asset ready for use. Expenses incurred after the asset is put into use, such as ongoing maintenance, are recognised as operating expenses, while upgrades or improvements are added to the asset's cost and depreciated along with it.

The depreciation period and method are reviewed annually. The residual value is estimated at each year-end, and changes in the estimate are recognised as an estimate change.

Significant assets consisting of substantial components with different useful lives are decomposed with different depreciation periods for the various components.

Intangible assets

Individually acquired intangible assets are recognised in the balance sheet at cost. Intangible assets acquired through business combinations are recognised in the consolidated financial statements at fair value. In subsequent reporting periods, intangible assets are measured at cost, reduced by any accumulated depreciation and impairment.

Internally generated intangible assets, except capitalised development costs, are not recognised in the balance sheet but are expensed as incurred.

Intangible assets with a definite useful life are depreciated over their economic life and are tested for impairment when there are indications of impairment.

Goodwill and intangible assets with an indefinite useful life are not depreciated but are tested for impairment if there are indications of impairment, at least annually, either individually or as part of a cash-generating unit. For intangible assets with an indefinite useful life, an annual assessment is made as to whether the assumption of indefinite useful life can be justified. If not, changes in useful lives are accounted for prospectively.

Gain or loss on disposal of intangible assets is calculated as the difference between net sales proceeds and carrying amount. Gain is recognised as "other operating income" and loss as "other operating expenses".

Development

Development expenditure is capitalised to the extent that one can identify a future economic benefit related to the development of an identifiable intangible asset and where the acquisition cost can be reliably measured. Otherwise, such expenses are expensed as incurred. Capitalised development costs are depreciated on a straight-line basis over the economic life.

Write-downs of non-financial assets

The group evaluates at each reporting date whether there are indications that an asset has declined in value. If such

of the document.

Document ID:
2850D89B763F467EB0343713D3193C51

indications exist, the asset's recoverable amount is estimated.

The recoverable amount is considered as the higher of fair value less costs to sell and value in use, and is calculated for an individual asset, unless the asset does not generate cash inflows that are largely independent of cash inflows from other assets or groups of assets.

An asset has declined in value when its' carrying amount exceeds its recoverable amount, and in such cases, the asset is written down to its recoverable amount. The reduction is a loss on impairment, which is recognised in profit or loss.

The group evaluates at each reporting date whether there are indications that an impairment loss recognised for an asset other than goodwill in prior years no longer exists or has decreased. If such indications exist, the recoverable amount of this asset is estimated, and the previously recognised impairment loss is reversed up to a maximum amount that does not exceed the carrying amount that would have been determined with deductions for accumulated depreciation.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset for one entity and a financial liability or an equity instrument for another entity.

Financial assets

The group's financial assets are: trade receivables, other receivables and cash and cash equivalents.

The classification of financial assets at initial recognition depends on the characteristics of the contractual cash flows of the asset and the business model that the group uses in managing its financial assets. With the exception of trade receivables that do not have a significant financing element, the group recognises a financial asset at fair value plus transaction costs, if the financial asset is not measured at fair value with value changes through other income and expenses, transaction costs.

Financial assets measured at amortised cost

The group measures financial assets at amortised cost if the following conditions are met:

- The financial asset is held in a business model where the objective is to collect contractual cash flows, and
- The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on specified dates.

Subsequent measurement of financial assets measured at amortised cost is done using the effective interest rate method and is subject to impairment losses. Gains and losses are recognised in profit or loss when the asset is derecognised, modified, or impaired.

The company's financial assets measured at amortised cost include trade receivables and other short-term deposits

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or a part of a group of similar financial assets) is derecognised (removed from the consolidated balance sheet of the group) when:

- The contractual right to receive cash flows from the financial asset expires, or
- The group has transferred the contractual right to receive the cash flows from the financial asset, or has retained the contractual right to receive the cash flows from a financial asset but has assumed an obligation to pay them to another party; and either
 - a) The group has transferred substantially all risks and benefits associated with the asset, or
 - b) The group has neither transferred nor retained substantially all risks and benefits associated with the asset but has transferred control of the asset.

Financial liabilities

Financial liabilities are, at initial recognition, classified as loans and obligations. Loans and obligations are recognised at fair value adjusted for directly attributable transaction costs.

Loans and obligations

After initial recognition, interest-bearing loans will be measured at amortised cost using the effective interest rate

This file is sealed with a digital signature.
The seal is a guarantee for the authenticity
of the document.

Document ID:
2850D89B763F467EB0343713D3193C51

method.

Gains and losses are recognised in the income statement when the liability is derecognised.

Amortised cost is calculated by taking into account any discount or premium on purchase, or costs and fees that are an integral part of the effective interest rate. The effective interest rate is presented as finance costs in the income statement.

Liabilities are measured at their nominal amount if the effect of discounting is insignificant.

Derecognition of financial liabilities

A financial liability is derecognised when the liability is settled, cancelled or expired. When an existing financial liability is replaced with a new liability from the same lender where the terms are substantially modified, or the terms of an existing liability are materially modified, the original liability is derecognised, and a new liability is recognised. The difference in the carrying amount is recognised in profit or loss.

Measurement of fair value

Fair value of financial instruments traded in active markets is determined at the end of the reporting period by reference to quoted market prices or dealer prices (bid prices for long positions and ask prices for short positions) without deduction of transaction costs.

For financial instruments not traded in an active market, fair value is determined using an appropriate valuation method. Such valuation methods include the use of recently executed arm's length market transactions between knowledgeable and willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow calculations, or other valuation models.

Cash and cash flow statement

Cash and cash equivalents include cash, bank deposits, and other short-term, highly liquid investments. The cash flow statement has been prepared using the indirect method.

Events after the balance sheet date

New information after the balance sheet date regarding the company's financial position on the balance sheet date has been taken into account in the financial statements. Events after the balance sheet date that do not affect the company's financial position on the balance sheet date, but that will affect the company's financial position in the future, are disclosed if they are significant.

Remaining estimated rental payments	171 435 048	138 158 362	171 435 048	138 158 362

Overview of present value of remaining est. rental payments:

	Vipps MobilePay AS		Vipps MobilePay AS Group	
	2024	2023	2024	2023
Within 1 year	33 081 798	26 677 304	33 081 798	26 677 304
1 to 5 years	106 607 307	72 505 835	106 607 307	72 505 835
After 5 years	-	-	-	-
Present value of remaining estimated rental payments	139 689 105	99 183 139	139 689 105	99 183 139

Lease obligation recognised in the balance sheet	139 689 105	99 183 139	139 689 105	99 183 139
Of which:				
short-term debt	33 081 798	26 677 304	33 081 798	26 677 304
long-term debt	106 607 307	72 505 835	106 607 307	72 505 835

Variable rent in connections with the leases amounts to MNOK 15,4 in 2024. The costs are largely related to overheads and non deductible VAT.

Leases that are not recognised on the balance sheet

The rental costs for the year consisted of the following:

	Vipps MobilePay AS		Vipps MobilePay AS Group	
	2024	2023	2024	2023
Costs related to short-term leases (incl. short-term leases of low value)	9 354 335	11 272 313	9 354 335	11 272 313
Total rental cost included in other operating expenses	9 354 335	11 272 313	9 354 335	11 272 313

Leases that are not recognised in the balance sheet mainly have a duration of less than 1 year and mainly concerns parking and other rental costs.

Intangible assets are mainly acquired through development and projects, both completed and ongoing.

Cost related to projects have been activated to support Vipps MobilePay AS's goal and ambition to grow further within the e-commerce market and support the strong position within physical commerce and develop services for login and identification that are simple and safe. In 2024 costs have mainly been activated on various projects related to functionalities in the Vipps app and technical platform.

Capitalised costs on the projects are mainly related to work performed by employees and external consultants, in addition some costs related to machines and software are enabled.

Impairment tests have been carried out at the end of the year for the intangible assets. The impairment test concludes that there was a writing down of the intangible assets as of 31.12.2024.

The goodwill comes from the merger with Sparebank 1 payment MNOK 100 and the merger with MobilePay A/S MNOK 1 335.

Note 14 - Bank deposits

As of the end of 31.12.24, the Group has NOK 16 599 807 in restricted tax deduction funds, distributed as follows:

Vipps MobilePay AS	16 599 807
	16 599 807

Vipps MobilePay AS has a total credit of MNOK 1 028 as of 31.12.2024 and nothing is used.

In addition Vipps MobilePay AS has NOK 798 010 800,81 in client funds corresponding to client responsibility as of 31.12.2024. Funds that have not been transferred to the payee, and where Vipps MobilePay AS has not received the funds from the previous day are not defined as client funds. Client funds are not posted.

Note 15 - Financial risk, classification of financial instruments and fair value measurements

The Group and the parent company have limited exposure to financial risk.
The most important financial risks to which the Group is exposed to relates to credit risk and liquidity risk.

i) Credit risk

The Group is mainly exposed to credit risk related to trade receivables and other current receivables. There is no significant credit risk associated with a single counterparty or multiple counterparties that can be perceived as a group due to similarities in credit risk.

ii) Liquidity risk

Liquidity risk is the risk that the Group will not be able to service its financial obligations as they mature. The Group's strategy for managing liquidity risk is to have sufficient liquid assets at all times to meet financial obligations at maturity, including extraordinary events without risking unacceptable losses or the Group's reputation.

Classification of financial instruments**Vipps MobilePay AS Group**

The Group's financial assets consist of receivables and bank deposits that are assessed at amortised cost in their entity.
All the Group's financial liabilities are assessed at amortised cost.

Vipps MobilePay AS

The company's financial assets consist of receivables and bank deposits that are valued at amortised cost in their entity.
All of the company's financial liabilities are assessed at amortised cost.

Principles for calculating fair values

Financial instruments of the parent company and the group's financial statement consist of cash, trade receivables and current liabilities.
All are rated at face value which represents fair value.

Note 17 - Estimate uncertainty

Management has used estimates and assumptions that have affected assets, liabilities, revenues, costs and disclosure of potential liabilities. This applies in particular to the assessment of intangible assets. Future events may cause estimates to change. Estimates and the underlying assumptions are assessed on an ongoing basis. Changes in accounting estimates are accounted for during the period in which the change occurs.

Valuations of intangible assets

The most important estimates and assumptions, where there exist a significant risk of materially affecting the book values of assets and liabilities during the next financial year, relates to the valuation of intangible assets. Intangible assets related to software, development and licenses are depreciated over an expected useful life estimated at between 3 and 8 years, depending on the specific assessment for each individual intangible asset. The assets that are subject to depreciation are evaluated annually for possible impairment. Recyclable amounts for cash-generating units are determined based on fair value less sales costs or on use value, see note 8.

To the General Meeting of Vipps MobilePay AS

Independent Auditor's Report

Opinion

We have audited the financial statements of Vipps MobilePay AS, which comprise:

- the financial statements of the parent company Vipps MobilePay AS (the Company), which comprise the balance sheet as at 31 December 2024, the income statement, statement of comprehensive income and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- the consolidated financial statements of Vipps MobilePay AS and its subsidiaries (the Group), which comprise the balance sheet as at 31 December 2024, the income statement, statement of comprehensive income and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable statutory requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act, and
- the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors and the Managing Director (management) are responsible for the information in the Board of Directors' report. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report otherwise appears to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable statutory requirements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with simplified application of international accounting standards according to the Norwegian Accounting Act section 3-9, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty

exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Tillatelse til å utarbeide årsregnskap og årsberetning på engelsk for Vipps Mobilepay AS, org.nr. 918 713 867

Vi viser til deres brev av 5. november 2023 der det søkes om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk for Vipps Mobilepay AS.

Skattekontoret gir på bakgrunn av en konkret helhetsvurdering Vipps Mobilepay AS dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk, jf. regnskapsloven § 3-4 tredje ledd. Dispensasjonen gjelder så lenge opplysningene som danner grunnlaget for vedtaket ikke endres vesentlig.

Kopi av dette brevet må sendes til Regnskapsregisteret i Brønnøysund sammen med årsregnskapet. Den regnskapspliktige må selv dokumentere ved dette brev at tillatelse er gitt.

Bakgrunn

Vipps Mobilepay AS er eid av et norsk og et utenlandsk selskap og er en del av et internasjonalt konsern. Selskapet har som formål:

«Drive virksomhet som e-pengeforetak som regulert i lov, forskrift og konsesjon samt å utvikle og levere elektroniske betalingsløsninger. Selskapet skal innenfor de rammer som følger av lov, forskrift og konsesjonsvilkår i tillegg kunne drive virksomhet som har naturlig tilknytning til forannevnte virksomhet. Selskapet skal også kunne ha eierandeler i andre selskaper med lignende tilknyttede formål.»

Virksomheten er rettet mot både privat- og bedriftsmarkedet. To av styremedlemmene i selskapet er utenlandske.

Skattekontorets vurdering

Etter regnskapsloven § 3-4 tredje ledd skal "årsregnskapet og årsberetningen [...] være på norsk. Departementet kan ved [...] enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap mv., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til "informative regnskaper for ulike grupper av regnskapsbrukere". Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet.

Det er etter skattekontorets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk kan gis, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir vesentlig berørt negativt ved en eventuell dispensasjon.

Det er særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. I denne vurderingen har skattekontoret lagt særlig vekt på at selskapet har profesjonelle eiere og er en del av et internasjonalt konsern. Videre er det vektlagt at selskapet driver virksomhet i en bransje der alle sentrale aktører behersker og benytter engelsk.

Vennligst oppgi vår referanse ved henvendelse i saken.

Med hilsen

Lars Waalorp
Skatteetaten
